A. Sources of Statistics: Canada's external trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of external trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. They are instead collected by the Manufacturing and Primary Industries Division of Statistics Canada.

Import statistics for shipments from the United States of less than \$2,500 are estimated on the basis of a 10 per cent sample of such shipments. The size of this sample is at present in excess of 20,000 shipments per month.

B. Concepts and Definitions Used in the Compilation of External Trade Statistics: The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United Nations Statistical Office (Series M, No. 52; New York, 1970). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's external trade statistics.

1. System of Trade: Canadian statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses).

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic, tourist purchases and settlers' effects are excluded for practical reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. Coverage: Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments or receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks and bonds are also excluded from the trade statistics.

A. Sources des statistiques: Les statistiques sur le commerce extérieur du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce extérieur est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Des statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Elles sont plutôt recueillies par la Division des industries manufacturières et primaires de Statistique Canada.

Les chiffres d'importation portant sur les livraisons en provenance des États-Unis avec une valeur inférieure à \$2,500 sont préparés d'après un échantillon de 10 pour cent. Cet échantillon comprend actuellement plus de 20,000 envois par mois.

B. Concepts et définitions utilisés dans la production de statistiques sur le commerce extérieur: L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, no 52, New York, 1970). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce extérieur du Canada.

1. Système commercial: Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation).

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international, les achats des touristes et les effets des migrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. Champ d'observation: Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.

3. **Valuation:** Imports are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.
4. **Trading Partner Attribution:** Imports are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin.
5. **Commodity Classification:** Commodity statistics in this report are shown in terms of the 1978 edition of the *Canadian International Trade Classification* (C.I.T.C.) Reference Manual (Cat. no. 65-502E) which replaces the 1972 edition (Cat. no. 12-544). Due to extensive revisions to the C.I.T.C. classification, it is not possible to publish a comparison of 1978 import data with previous years at the C.I.T.C. detailed level. Therefore, this report covers only 1978 annual commodity figures.
3. **Evaluation:** Les importations sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de livraison et leur prix englobe par conséquent les frais de transport.
4. **Partenaires commerciaux et attribution:** Les importations sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du Sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine.
5. **Classification des marchandises:** Dans ce bulletin, les statistiques sur les marchandises sont présentées d'après l'édition de 1978 du manuel de référence intitulé *La nomenclature canadienne pour le commerce international des marchandises* (N.C.C.I.), (no 65-502F au catalogue), qui remplace l'édition de 1972 (no 12-544F au catalogue). En raison des modifications considérables apportées à cette nomenclature, il est impossible de publier une comparaison des données sur les importations de 1978 avec celles des années précédentes au niveau de ventilation N.C.C.I. Par conséquent, le présent bulletin porte seulement sur les chiffres de 1978.

The C.I.T.C. is an expanded version of the 5-digit import commodity classification (M.C.C.) used in other publications of trade statistics. The C.I.T.C. contains some 16,000 commodity classes compared with some 2,700 classes in the M.C.C.. Statistics have been captured and edited at this level of detail since January, 1976 only, and consequently, earlier import statistics are available at M.C.C. level only.

Because of the unprecedented amount of detail contained in this publication, steps have been taken to prevent the disclosure either directly or residually of information pertaining to the operations of a single Canadian firm. Accordingly, certain commodity country cells are not shown at that level although the data are included in the total for the C.I.T.C. class in question. In a few cases, publication of the total for a C.I.T.C. class, even without country detail, would result in disclosure; in such cases, the C.I.T.C. class total is not shown but is nonetheless included in the total at the 5-digit level (M.C.C.) total. In a few cases, as well, the need to prevent disclosure has resulted in slight differences between the sums of C.I.T.C. classes and the total of the 5-digit level.

The symbol "x" indicates suppression of statistics to prevent disclosure, while the symbol "-" indicates either a zero amount or an amount too small to be expressed.

6. **Quantities:** Quantities, where available, are published in imperial and equivalent metric units of measure. These units and their conversion factors are listed on pages vi and vii of this report. Measures of weight or volume generally exclude any packing required for shipment and "numbers" refer to complete (or substantially complete) units imported, excluding parts. At the M.C.C. level, the imperial units of measure shown in this publication are usually identical to the units published in other External Trade publications (Cat. no. 65-007 and 65-203). However, at the request of our users and to retain comparability between quantity data for 1978 and previous years, the quantities for M.C.C. commodity classes 33707 to 33895 and 47922 have been converted to reflect the units of measure applicable in 1977, using an average conversion factor obtained from an analysis of the data.
6. **Quantités:** Les quantités disponibles sont publiées en unités métriques et impériales. Ces unités et leurs facteurs de conversion sont énumérés aux pages vii et viii du présent bulletin. Les poids et volumes ne tiennent généralement pas compte de l'emballage nécessaire à l'expédition et les "chiffres" concernent des unités complètes (ou essentiellement complètes), à l'exception des pièces. Au niveau de la C.M.I., les unités de mesure impériales que renferme ce bulletin sont habituellement identiques aux unités contenues dans les autres publications sur le commerce extérieur (nos 65-007 et 65-203 au catalogue). Toutefois, à la demande de nos utilisateurs et pour permettre la comparabilité entre les données de 1978 et celles des années antérieures, les quantités pour les classes de marchandises 33707 à 33895 et 47922 de la C.M.I. ont été transformées pour être compatibles avec les unités de 1977, à l'aide d'un facteur de conversion obtenu par une analyse des données.
